- 6) Union Square federal Credit Union, Wichita Falls, TX
Mold remediation of repo-properties*

*Our mold remediation delivery system sets us apart from the competition. We use a dry fog method that delivers a COLD STERILANT product to kill mold spores before we expose our workers to live mold during remediation. The two products we use set us apart as well, because of their mode of action to kill mold, bacteria and viruses. These products kill from mechanical electrocution and not liquid poisoning, which is very unique. The dry fog penetrates the HVAC systems, carpet fibers and other porous materials that are very difficult to remediate. **Our products are especially well received in the medical and pharmaceutical industries.** These products are safe on computers and electronics when delivered in a dry fog. Our process takes the liquid and atomizes it under pressure to create the fog. Unlike most delivery systems, the cold sterilant does not heat the product in order to deliver it. Heating the product reduces its activity to kill mold and bacteria. Most remediation companies leave the re-construction after remediation to another sub-contractor. We start and complete the entire

process, from demolition, to remediation, to re-construction ourselves without the need for additional sub-contractors. No job is too big or too small for our remediation services.

- 1) Bowie County Hospital, Bowie, TX
Complete Radiology Department remodel to support new CT Scanner install***
- 2) North Texas Neurology, Wichita Falls, TX
Complete Radiology Department remodel to support new CT Scanner install***
- 3) M.D. Anderson Hospital, Houston, TX
Installation of 320 view boxes throughout the hospital****

*Provided General Contractor services from demolition to remodel of the Radiology Departments. The old Department would not support the addition of the new CT Scanner without a complete remodel. In addition to providing the demo and remodel services, we also provided the CT Scanner as well. We have access to CT Scanners, MRI's, Ultra Sound, C-Arms and DR Radiography units. We can sell and install just about any of these items you need.

**The view boxes were installed in order for the Doctors to view patient exams in various locations on each floor.

- 1) Dallas Cold Storage, Plano, TX
New construction 50,000 square foot cold storage facility***
- 2) Sam Cane Beef Processing, Corpus Christy, TX
New construction of cold storage facility***
- 3) Owens Country Sausage, Plano, TX
Construction of processing plant and cold storage facility***
- 4) Craft Foods, The Woodlands, TX
Construction of new cold storage facility***

*Very large facilities utilizing large insulation panels, up to 4' wide and 40' tall.
